

ColorSelect® Transfer Pod System

SOLOMON COLORS

Transfer Pod

Now, it's fast, efficient and safe to put the world's leading concrete color system into any job. No matter how small. Our compact Transfer Pod System lets you ship buckets of our leading ColorFlo® liquid pigments to outlying plants and directly into ready mix trucks. Solomon Colors' Transfer Pod System eliminates messy, wasteful bags by transferring pre-dispersed liquid color directly into the load. With the benefits of consistent full color development, your customers will be happier and you'll enjoy more profits.

**Optional handlebar and wheels available.*

- Dispense thousands of colors from our Bucket Table Dispensing System with the new Transfer Pod System.
- Simple to use, rugged in design, providing years of reliable operation.
- Our ColorSelect® Transfer Pod System makes placing color into any job fast, easy and profitable.

Transfer Pod

ColorSelect® Transfer Pod System

SOLOMON COLORS

Transfer Pod

Specifications:

- Electronic controlled transfer system
- 17 gallon conical-bottom holding tank with water rinse
- Automatic pre-wet and rinse cycles
- 3/4" NDB-20 diaphragm pump

Physical Size:

- Control Panel 12 x 10 x 5 inches
- 17 gallon holding tank 40 x 20 x 24 inches
- Approximate Weight 90 lbs.
- NDB-20 Diaphragm Pump 13 x 10 x 13 inches

System Requirements:

- Air 60-80 PSI, 15 CFM, 1/4 inch quick connect
- Water 40 PSI continuous pressure
3/4 inch female hose connection
- Electrical 110 volt

Controls:

- E-Stop - Emergency stop button, must be out for the Transfer Pod system to operate.
- Pre-Load - Starts the initial water to wet the tank.
- Pump - Starts the transfer of the ColorFlo® liquid pigment.
- Rinse - Starts the final rinse, cleans the Transfer Pod for the next color.

System Operation:

- Transfer Pod is located conveniently at ground level next to where the ready mix truck will be loaded.
- Press Pre-Load for the initial water.
- Open lid and pour pre-measured ColorFlo® liquid color into the Transfer Pod. Close lid, press Pump to begin the transfer into the ready mix truck.
- When the tank is empty, press Rinse. The water rinse cycle will clean and purge the rinse water into the ready mix truck. The Transfer Pod is now ready for the next color.
