

“Supply + Demand = Growth”

Springfield, IL – Solomon Colors is completing another facility expansion at their Springfield, Illinois headquarters – the second in three years. The new 80,000 square foot facility expansion will allow Solomon Colors to increase their warehousing and manufacturing capabilities to meet increasing customer volume. In 2004, Solomon Colors constructed an expansion facility for their dispenser technicians and dispenser equipment manufacturing.

“The boom in decorative concrete over the last decade has been tremendous. Even with the very recent addition of our dispenser manufacturing plant, we needed more area for warehousing to expedite customer orders and meet demand; this will help us serve our customers even better,” commented Mike Ward and Clinton Metrin, who are both serving the Texas area for Solomon Colors.

Rich Solomon, President and CEO of Solomon Colors, added “We have found that our success over the last nearly 8 decades has been built on simple principles of anticipating customer needs and being responsive to industry changes. Adding another facility makes sense to be able to cost-effectively move product faster and more efficiently to our customers.”

It is an exciting time for Solomon Colors as they and their markets experience continued growth. For more information on Solomon’s integral color or dispensing equipment, visit www.solomoncolors.com or call 1-800-624-0261.
