Refresh is a solvent based penetrating, polysiloxane stain with excellent sealing properties. Use it to re-color exterior new or old concrete surfaces. Brickform Refresh converts gray or colored concrete, or concrete masonry, with surface marks and defects into a semi-opaque, consistent, natural looking color. The polysiloxane chemistry penetrates into the concrete for water repellency and protection. Refresh Color Packs come in 16 standard colors as shown, with custom colors and color matching available. Refresh can also be ordered as a Ready-to-Use product with the color pre-mixed. Bring new life to your concrete with Brickform Refresh.

Disclaimer - When choosing colors, use the appropriate Brickform or Solomon Colors selection guide for more accurate matching. Colors shown here display only the range of options available. To confirm an exact color, have your contractor prepare a color sample for your approval before actual construction. Brickform accepts no responsibility for color matching or misprints.
Features
• Natural looking color
• 16 standard colors are available as Refresh Color Packs
• UV resistant, non-yellowing
• Modifies existing color and protects concrete
• Not a heavy film forming product, leaving natural concrete texture
• Water and weather resistant sealing
• Custom color matching possible

Coverage Rates & Packaging
Available in 5 gal (18.9 L) cans
• Approximately 200 to 300 ft² per gal (4.9 to 7.4 m²/L).
• Approximately 1000 to 1500 ft² per 5 gal can (24.5 to 37 m²/L)

Product Use
Brickform Refresh is recommended for re-coloring old concrete surfaces or to even out surface appearance on newly poured concrete. The product provides protection from water and weathering concerns.

The product is purchased in two components—the un-colored Brickform Refresh base and the Refresh Color Pack. Choose the Color Pack as a closest match to the existing concrete color or as a semi-opaque color modifier. The product does not provide full coverage like an opaque coating would. It will not fully cover all defects and stains. Test an area prior to use of the product to determine that the desired outcome can be achieved. There are 16 standard colors are available on the Brickform Refresh Color Card.

Brickform recommends job site samples and mock-ups using techniques and materials to be used in performance of the project.

While Refresh provides concrete sealing properties, for more surface protection and sheen use a spray applied acrylic sealer from Brickform such as Poly-Seal or Gem-Seal. Do not back roll when applying the acrylic sealer.

Surface Preparation: Surface preparation is an important process when using any topicaly applied product available from Brickform. Brickform follows the surface preparation techniques recommended by the International Concrete Repair Institute outlined in its Guideline No. 03732 Selecting and Specifying Concrete Surface Preparation for Sealers, Coatings, and Polymer Overlays. This Guideline is available at icri.org and Brickform recommends obtaining a copy and thoroughly familiarizing yourself with the processes for accurately preparing concrete slabs. Please consult the Technical Information Sheet (TIS) for this product for more details on Surface Preparation.

Previously applied sealers and curing products must be removed as well.

Once the slab has been profiled, all contaminants and potential bond breakers removed and thoroughly cleaned, allow the slab to completely dry prior to application of the product.

Do not use this product where hydrostatic pressure is present.

Mixing: Always test a small area of surface to verify protection and appearance. Use Brickform Refresh full strength. Do not dilute. Use protective clothing, goggles, gloves, and respirators when handling and mixing this product.

Pour the entire contents of the Brickform Refresh Color Pack into the 5 gallon Refresh base. If color remains in the Color Pack jar, add some of the base to the jar and shake with the lid on. Pour the remaining material into the Refresh base. Thoroughly hand mix the colored Refresh mixture agitating any pigment that settles on the bottom of the pail. Do not use a power drill or other spark creating device as this could ignite acetone vapors.

Application: Apply from 2-3 light, even coats with a pump sprayer that is acetone compatible. Wait until dry to the touch between coats. Keep the product agitated while applying. A conical tip or the Brickform Precision Tip are recommended on the pump sprayer for consistent application.

Apply in temperatures between 50°F and 95°F (10°C and 35°C). Avoid using in direct sunlight, especially on hot, windy days. Apply during the cooler part of the day when the surface is shaded. Use only in well ventilated areas and wear proper PPE when applying.

It is important to protect areas against overspray as the product will penetrate porous surfaces and will be difficult to remove. Soak up product with a damp rag or sponge where puddling occurs during application. Allow 2-4 hours before foot traffic and 4 hours before exposure to rain.

Complimentary Products
The following Solomon Colors products may be used with Brickform Refresh
• E-Etch
• Neutra Clean
• Strip-It
• Gem-Seal or Poly-Seal

Recommended Tools
• Acetone-compatible pump sprayer
• Brickform Precision Tip or conical tip

Safety and Precautions
Precautionary Statements - Prevention
Obtain special instructions before use
Do not handle until all safety precautions have been read and understood
Use personal protective equipment as required
Wash face, hands and any exposed skin thoroughly after handling
Avoid breathing dust/fume/gas/mist/vapors/spray
Use only outdoors or in a well-ventilated area
Keep away from heat/sparks/open flames/hot surfaces. - No smoking
Keep container tightly closed
Ground/bond container and receiving equipment
Use only non-sparking tools
Take precautionary measures against static discharge
Use explosion-proof electrical/ventilating/lighting/equipment
Keep cool

Storage
Store in a safe place. Keep containers tightly sealed. Shelf life is approximatley 36 months.

Warranty
This product is not intended for public use and is intended for use by licensed contractors and installers, experienced and trained in the use of these products. It is warranted to be of uniform quality, within manufacturing tolerances. The manufacturer has no control over the use of this product, therefore, no warranty, expressed or implied, is or can be made either as to the effects or results of such use. In any case, the manufacturer’s obligations shall be limited to refunding the purchase price or replacing material proven defective. The end user shall be responsible for determining product’s suitability and assumes all risks and liability.
