Project Profile

Project: Under Armour Retail Store #3

Profile: Lythic Polished Concrete Products

Materials: Lythic Densifier
Lythic Protector
Lythic Cleaner

Location: USA

Overview: Under Armour outlets have extensively used polished concrete as the flooring surface of choice. The urban industrial feel works well for the theme of the stores at the same time as providing function and durability. Keeping the stores operational with minimal maintenance is important to retail outlets.

Lythic polished concrete products have proven to be very successful due to offering a fully engineered system that is easy to use. The unique colloidal silica technology offers superior performance and speed when compared to other chemicals on market. Lythic offer solutions to the design community that are unrivaled.
