Project: Ikea Store
Profile: Lythic Polished Concrete Products
Materials: DAY1 Concrete Finishing Aid
          Lythic Densifier
          Lythic Cleaner
Location: Australia
Overview: Ikea is one of the original European companies who engaged with polished concrete in the early 90’s. With stores world wide they have a vast understanding of what to expect from a polished concrete floor. Lythic Solutions is working at multiple levels throughout the Ikea contracting stages to continue the high standards the stores expect.

Retro polishing many of the old stores is part of the fast track features Lythic Densifiers offer as a solution. The quick reactive time of the pure silica reduces the number of hours needed for dwell time traditional silicates need.

Big brands can count on Lythic performance.
