Retail Store

Project Profile

Project: Calvin Klein Retail Store

Profile: Lythic Polished Concrete Products

Materials: Lythic XL Densifier
Lythic Protector
Lythic Cleaner

Location: United States

Overview: This retail chain has used polished concrete for several years. Recently the design team have chosen to renovate the older floors with a deep clean, protect and burnish. A honed finish was decided upon rather than a high gloss finish.

Lythic Cleaner was used with a black pad to remove topical stains. Lythic XL Densifier applied before burnishing at 800 grit. Lythic Protector and a final 800 grit burnish will ensure this store continues to meet the clients requirements.

Lythic Cleaner is used weekly for ongoing maintenance.
