Project Profile

Project: Starbucks #1
Profile: Lythic Polished Concrete Products
Materials: Lythic XL Densifier
          Lythic Protector
          Lythic Cleaner
Location: China
Overview: Starbucks is rapidly expanding into the Chinese market opening flagship stores in multiple major cities or close to tourist attractions like this location new Disneyland Shanghai.

No expense has been spared on the fixtures and fittings. This Starbucks floor used a polishable overlay with locally sourced white marble chips to be revealed by heavy grinding. Lythic XL Densifier was used to harden the floor before polishing up to a 400 grit honed finish.

Three coats of Lythic protector where used with a white pad high speed burnish. Lythic Cleaner is used for daily maintenance.
