Project: Fresh & Thyme Farmers Market
Profile: Lythic Polished Concrete Products
Materials:
- Lythic Pro-Dye
- Lythic Densifier
- Lythic Protector
- Lythic Cleaner
Location: United States

Overview: During the construction stages the owners decided they did not like the uncolored floor as it looked to industrial. After multiple samples Lythic Pro-Dye was chosen to add color during the polishing stages.

The floor was densified using Lythic Densifier both before and after the Lythic Pro-Dye to lock in the color. Lythic Protector was used as final protection for the floor. Cleaned daily with Lythic Cleaner and buffed dry.
