

Conduit – Utility Red

Solomon Colors Conduit Red is a high-visibility integral color for concrete-encased conduit, duct banks, and underground utility infrastructure.

Designed for large-scale electrical and utility projects, Conduit Red provides permanent utility red color throughout the concrete for clear identification after placement.

Ideal Applications

- Data center duct banks and conduit encasements
- Concrete-encased electrical conduit
- Underground utility infrastructure
- High-voltage cable routes
- Utility vaults and pull boxes
- Transformer pads and critical infrastructure

Recommended Loading Rates

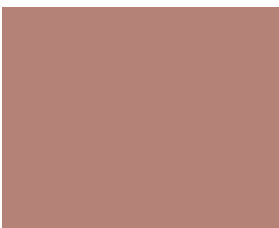

Intensity	Loading	Typical Use
Standard	1%	General utility visibility
Recommended	2-3%	Data center and duct bank projects
Heavy	4%	Maximum color intensity

Note: Typical loading shown for planning purposes only. Final dosage should be confirmed based on project specifications, mix design, cement color, and desired intensity.

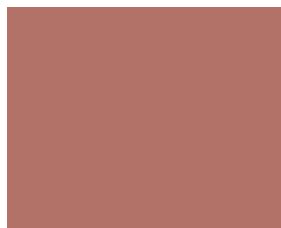

Conduit – Utility Red is available in 25 lb bags. ▶
