

Luxury Hotel Pool Deck

Luxury Hotel Pool Deck

Structure Type: Hotel Pool Deck
Project Type: Commercial
Location: Rio Grande, PR
Products: Stampable Overlay
Brickform Textures
Poly-Seal
Traction Grip
Cem-Coat
ARTesian Stain

Overview: The stamped concrete pool deck and surrounding outdoor recreation spaces were being restored and expanded. To add stamped texture without fully demolishing the existing concrete, Brickform Stampable Overlay with FM-3130 Aidan Ashlar stamps were used. To blend color between existing stamped and the overlaid surfaces, Cem-Coat was the primary coloring. This created consistent, opaque coloration. ARTesian water-based stain was used for highlights. Traction Grip was added to Poly-Seal to improve traction and safety on potentially wet surfaces. This project survived Hurricane Maria just a few months after completion.
