

QuickColor® GT Cube

**Custom built ColorFlo®
Granular pigment dispenser
for use in concrete products
manufacturing.**

SYSTEM

- Custom-built ColorFlo® granular pigment dispenser for concrete products manufacturing facilities
- Front-loading 4-color system
- Capable of serving multiple mixers
- Use with up to 4 cyclones or direct inject into concrete mixers
- Dense-phase pneumatic conveying
- Advanced diagnostics and easy scalability
- Optional Short Rack* for low ceiling installations (reduces height ~1 ft)

Features & Benefits

- ✓ Seamless integration to popular concrete batching plants
- ✓ State-of-the-art Siemens PLC control system with HMI and remote access capabilities
- ✓ Ethernet-based pneumatic control panel and cyclone service panel
- ✓ Electronic-assisted control valves for accurate dispensing
- ✓ Advanced diagnostics, record keeping, and reporting
- ✓ Easier scalability when adding multiple cyclones
- ✓ Full GT-1 control features in a smaller footprint

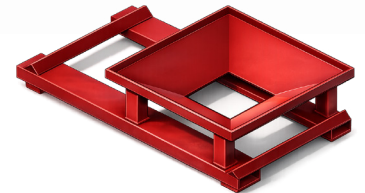

Specifications

Number of colors: 4

Cyclones: Up to 4

Footprint (H x W x D):

- 11'-11.25" H (without rack)
- 17'-9.5" H (with rack)
- 13'-6.7" W
- 7'-7.75" D

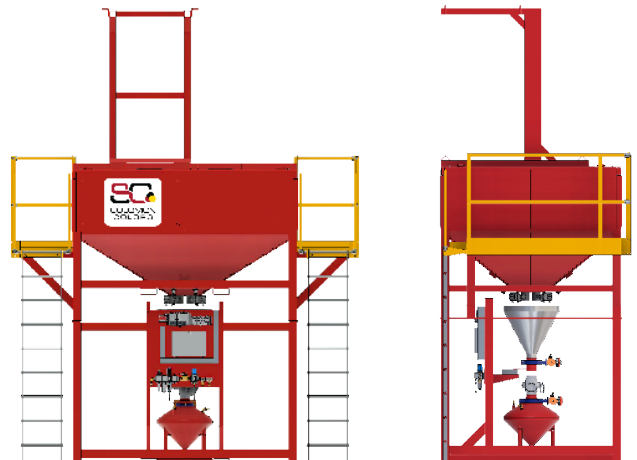

*Optional Short Rack

Scale capacity: 80lbs / 35kg stainless steel hopper

Load cell operating tolerance: = +/- 0.05lbs / 20 grams

Maximum load capacity: 80lbs / 35kg
